①Amount of groundwater and rainwater flowing into reactor and turbine buildings: 91 m^3/day, ②Amount of water transferred from groundwater drains to reactor and turbine buildings: 9 m^3/day, ③(Total of ① and ②): 100 m^3/day, Rainfall: 0 mm/week

There may be a difference between the sum of the individual data and the total value since the total value is the sum of the data with the first decimal place.

* Figures for ①, ③ and ④ have been calculated after elaborating some of cross sectional area of the process main building since April 4, 2024. Nevertheless, figure for ① may be estimated to be a negative value since the calculation still contains uncertainty.
