

<Marine Organism Rearing Log>

9 AM, February 28, 2023

Weather: Sunny

Water temperature: 17.7°C

As we mentioned before that even flounders born at the same time differed in body length and size, we have also found differences even in facial features. When we closely examined the condition of each flounder, we found the one with the lower lip protruding. This reminds me of a famous comedian to whom I have a personal attachment.
