

<Marine Organism Rearing Log>

9AM, March 15, 2023

Weather: Sunny

Water temperature: 18.5°C

We provide a video of abalone from today. Abalones hide up in their shelter during daylight hours as they dislike brightness. When the shelter roof is lifted while we clean the tank, it suddenly becomes brighter. Abalones rush and scurry to find a dimly lit place (they look to move slowly, though).

Click the following link for the video (in Japanese only).
