

<Marine Organism Rearing Log>

9AM, March 16, 2023

Weather: Sunny

Water temperature: 18.7°C

When we lift the roof of the shelter to clean it, dozy abalones sticking at the back side of the roof come to realize they are not in the water, and head off for darkness in the water running about in confusion. Since abalones have eyes, they can locate their favorite dark places.
