

<Marine Organism Rearing Log>

9 AM, April 28, 2023

Weather: Sunny

Water temperature: 18.5°C

Golden Week (string of public holidays in May) starts tomorrow. Some people will enjoy nine consecutive days off. With the relaxation of COVID-19 restrictions, it is expected that transportation facilities as well as tourist spots will be crowded after a long time. However, there is no holiday for the care of flounders and abalones. As a caretaker, I would like to adjust shifts to join special events held during the Golden Week, if possible.

<Next report will be on May 1, 2023.>

The number of dead abalones and removed for research				
	No. of dead abalones		Removed for research	
	4/21-4/27 (No.)	Survival Rate (%, accumulated)	4/21-4/27 (No.)	Accumulated (No.)
Regular seawater①	2	78.1	0	0
Regular seawater②	4	80.0	0	0
ALPS treated water added①	6	74.5	0	0
ALPS treated water added②	3	71.4	0	1

*For accuracy, counted from Friday of the previous week to Thursday.
*No dead flounders
