

<Marine Organism Rearing Log>

9 AM, May 10, 2023

Weather: Sunny

Water temperature: 17.6°C

Professor Kato of Aquaculture Research Institute, Kinki University visited us again to check the growth status of flounders and abalones. Dr. Kato commented that he saw no difference in growth conditions between the ALPS treated water added tanks and normal seawater tanks, and that they were as good as those under the rearing conditions at the university.
