

<Marine Organism Rearing Log>

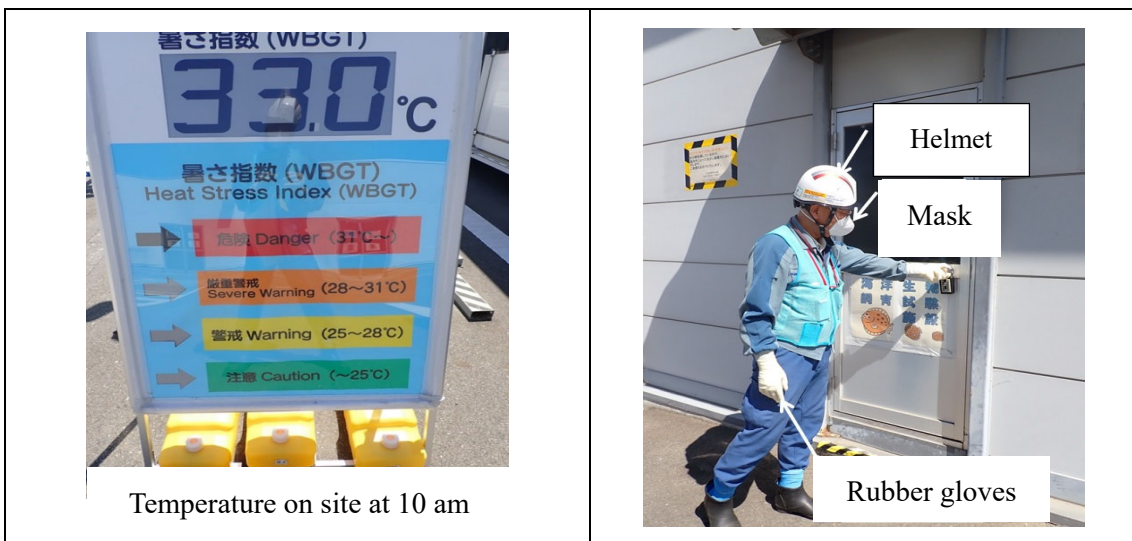

9AM, July 28, 2023

Weather: Cloudy

Water temperature: 18.7°C

As the heat wave continues, the heat index (WBGT) at the power station has exceeded 31°C, which puts it in the "danger" zone. The site is a controlled area, so we are required to wear work clothes, gloves, masks, and helmets. That means that we must bear the blazing sun and be careful not to get overheated until we reach the test breeding facility.

< Next report will be on July 31 >
