

<Marine Life Rearing Log>

9 AM, October 2, 2023

Weather: Sunny

Water temperature: 17.7°C

It has been one year since we started our rearing tests using ALPS treated water, so we decided to compare conditions one year ago with conditions now. First, let's start with the flounder, which a year ago were the size of the palm of your hand, and most certainly thinking, "What's going to happen to us now?" Today they are the size of an A4 sheet of paper, and the tank looks a little cramped.
