

<Marine Life Rearing Log>

9 AM, October 5, 2023

Weather: Sunny

Water temperature: 18.3°C

Abalone are delicate, and we were told by experts that raising them in a closed-circulation tank would be difficult. During rearing, the competition for survival has also been fierce, and about half of them died within a year due to injuries or other causes. However, some of the surviving abalone have grown quite large.
