

<Marine Organism Rearing Log>

9 AM, October 20, 2023.

Weather: Sunny

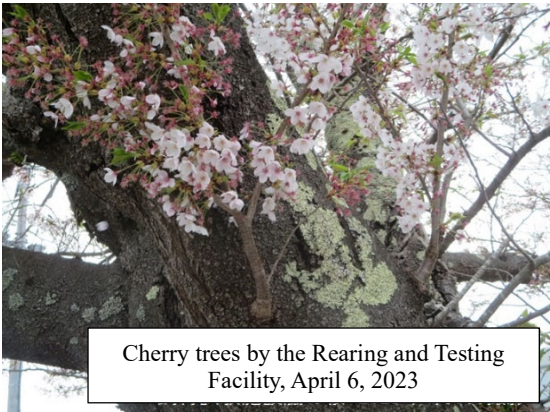

Water temperature: 18.6°C

Autumn has quickly arrived in Hamadori, where the power station is located, and the mornings and evenings have become bitterly cold. The leaves on the cherry trees by the rearing and testing facility have changed color, and we can sense that winter is just around the corner. The heaters in the rearing tanks have been turned on after being turned off for the summer.

<Next report will be October 23>.
