

<Marine Organism Rearing Log>

9 AM, November 29, 2023

Weather: Sunny

Water temperature: 18.6°C

This Monday, we fed abalone at the training and rearing facility with dried kelp that we rehydrated with seawater along with mixed feed. We put a feeding board on top of the kelp to make it easier for the abalone to eat, and we observed the abalone for two days. Today, we took out the kelp and are closely checking its condition.
