

<Marine Organism Rearing Log>

9 AM, December 20, 2023

Weather: Sunny

Water temperature: 18.5°C

These are photos of the flounder at the training and rearing facility. Although winter has suddenly arrived, the water temperature is comfortable at around 18°C. New lighting was installed in conjunction with renovations to help maintain the room temperature, so we can now clearly see what is going on underwater, and the YouTube Live-stream is also very clear.
