Tokyo Electric Power Company Holdings, Inc.  
Fukushima Daiichi D&D Engineering Company

- On March 24, the IAEA review team in Japan visited the Fukushima Daiichi Nuclear Power Station and observed the sampling of ALPS treated water from the measurement/confirmation facility.
- This is the second time that the IAEA has observed sampling this year (1<sup>st</sup> time: February).
- A portion of the sampled water shall be analyzed at an IAEA research facility in order to verify TEPCO's analysis method and results.
